SLC (+2)   Kathmandu, Santinagar, Tinkune

Vs niketen college

Gpa obtained - 3.08

Bachelor of Computer Application   Kathmandu, Thapathali

Everest College   Present

Currently in 3rd year

PROJECTS

Blood Bank Management System

The Blood Bank Management System is a web application built with HTML, CSS, Bootstrap, PHP, and MySQL to efficiently manage blood donations and requests. It enables users to register as donors, search for available blood groups, and request blood when needed. The system includes an admin panel for managing donor records, blood inventory, and user requests, ensuring a streamlined and transparent process for blood donation and transfusion services.

Personal Blog Website

This personal blog website is built using Django with Jinja templates, providing a clean and dynamic platform for blogging. Users can create, edit, and manage posts, categorize content, and interact through a comment system. The backend, powered by Django's ORM, ensures secure authentication and efficient data management. With a responsive design using Bootstrap, the site offers a smooth reading and writing experience, making it ideal for sharing personal insights and stories.
